Omega-3 Refinery completes first commercial production run

SeaDragon Limited (NZX:SEA) is pleased to announce that the first commercial production run through its new Omega-3 factory has been completed and that the refined oil has successfully met the requirements for commercial sale.

As previously announced on 17 December 2015, during the initial production run, a relatively minor amount of additional work to the new Omega-3 refinery was identified as being required to allow that production run to be completed. That work was completed earlier this month and SeaDragon proceeded to complete that initial production.

About SeaDragon www.seadragon.co.nz

SeaDragon (NZX:SEA) is New Zealand's largest refiner and blender of high-quality, internationally-certified concentrated fish oils and fractions, including Omega-3 oils. Our oils are sourced from fish caught in the clean and pure waters around New Zealand, in the Southern Ocean, and elsewhere. We have more than 20 years' experience processing fish oils and we are recognised for the quality and purity of our products. We supply health supplement manufacturers around the world to meet the burgeoning demand for pure, high-quality fish oils, which are scientifically proven to deliver significant human health benefits such as lowering the risk of heart disease, improving brain function and joint health. The majority of our supply is exported.
