SeaDragon Limited announces Director changes

SeaDragon Limited (NZX:SEA) today announces the appointment of Dr Craig Patch to the Board of Directors, with effect from the 1st of October 2019.

Craig is a nutrition innovator with over 20 years experience dedicated to improving nutrition, health and wellness. He is currently Professor of Dietetics & Human Nutrition at La Trobe University, Melbourne and Director of Limos Therapeutics (a pharmaceutical spin-out). Previously Craig led the commercial strategy for Clover Corporation resulting in the launch of many novel nutritional ingredients sold globally. His expertise is in the area of omega-3 fatty acids and branched chain fatty acids for improving neurological health outcomes. Craig has a Bachelor of Applied Science, is a qualified dietitian, and has a MBA and a PhD in biomedical science.

Chairman Bryan Mogridge said: "SeaDragon Directors are very pleased to welcome Craig to the Board and look forward to his insights and assistance with the future growth and development of our company and its specialty products."

At SeaDragon's next meeting of shareholders, shareholders will be asked to formally elect Craig Patch as a Director, in the meantime he is appointed by the Board as a casual appointment.

For the purposes of NZX Main Board Listing Rule 2.6.1, the Board has determined that Craig Patch is an Independent Director.

About SeaDragon: www.seadragon.co.nz

SeaDragon Limited (NZX:SEA) is New Zealand's largest refiner and blender of high-quality, internationally certified concentrated fish oils and fractions, including Omega-3 oils. Our oils are sourced from fish caught in the clean and pure waters around New Zealand, in the Southern Ocean, and elsewhere. We have more than 20 years' experience processing fish oils and we are recognised for the quality and purity of our products. We supply health supplement manufacturers around the world to meet the burgeoning demand for pure, high-quality fish oils, which are scientifically proven to deliver significant human health benefits such as lowering the risk of heart disease, improving brain function and joint health. The majority of our supply is exported.
